Natural Paints - pleasant and different

URA-Coloring Paste No. 410 is suitable for tinting all LIVOS Wall Paints, as well as DUBRON-Natural White Plaster No. 465. The coloring paste is resistant to light and wipe-able in combination with LIVOS Wall Paints. It only shows a reduced smear resistance when used as full-tone-paint.

URA-Coloring Paste No. 410 is for the time being available in 18 different colors, which you can find on the reverse side as printed samples. For tinting, URA is mixed first with the same or twofold amount of the Wall Paint you have chosen and then stirred into the remaining wall paint.

For more information as well as our safety advises, please read our Technical Data Sheets or the information panel on our packaging.

All **LIVOS** products have been tested intensively to guarantee advantageous working properties. All ingredients are disclosed in the context of a controlled full declaration. The sourcing of raw material as well as the production is carried out according to social and ecological guidelines. Besides, **LIVOS** neutral products undergo external scrutiny by the German Institute for Quality and Environment Control (IQUH).

Please also contact your local **LIVOS** retailer or contact us directly. You can also visit our website www.livos.de or call our hotline +49(0)5825-8830.
