

Case study: School Hall and Gym

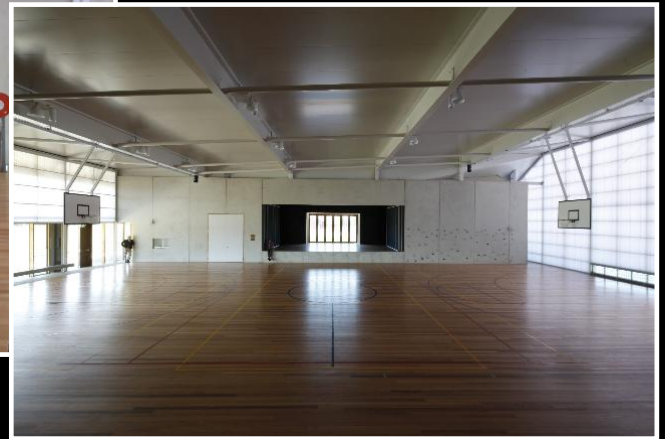

Site: Award winning St Mary's Primary School

Flooring: New hardwood Vic Ash Flooring, 757 sq mt sanded and oiled in May 2011

History: New timber was laid and sanded prior to line markings. The floor was then buffed to remove dust and oiled with Kunos natural oil sealer #244. On completion and just prior to hand over, the floor was again buffed to remove the surface dirt from construction.

Maintenance: Floor has been washed with Trena PH neutral cleaner by the school's maintenance team using a Nilfisk Alto Scrubtec 343E

Rejuvenation: 5 Lt of Kunos natural oil sealer #244 was used by school's own maintenance team in August 2014

The floor was so well maintained that even after heavy usage it only required a minor rejuvenation after 3 years.
